EXPERIENCE

Freelance Consultancy — *Full-Stack Developer*

March 2023 – PRESENT

- Advised Stephenson Law on critical infrastructure requirements for Roost.
- Developed the Miqo platform and other web-based tools for Rubric Law.
- Worked on a social network (with integrated scoring system) for a leading US sporting goods company.
- Built the second generation of the Irish Sailing Club membership platform.

Stephenson Law — *Lead Developer*

October 2021 – March 2023

- Formed a new in-house development team and established the team's best practices.
- Took ownership of existing custom applications and developed new ones.
- Built a business-critical customer portal and record compliance system, integrating with various back-office applications and external APIs.

Worktribe — *Full-Stack Developer*

March 2020 – October 2021

- Worked closely with designers and product owners to build a new cross-platform React Native application covering desktop, browser and mobile, driven by a headless Laravel API and websockets server.
- Worked on bug fixes and support for the existing legacy PHP application.

New Vision Software — *Software Developer*

October 2017 – March 2020

- Refactored a legacy, procedural PHP application for a leading energy broker. Applied clean code practices and design patterns to produce maintainable, scalable and object-oriented code.
- Built multiple API middleware services for clients, to synchronise data between systems in real-time.

EDUCATION

University of South Wales, Newport — *Degree*

2010 – 2011

Documentary Film & Television (BA Hons)

About

I have significant experience building production software, API integrations and working across the stack. I focus on making exceptional products and have a skill for developing great UX. I have a level-headed and pragmatic approach to problem-solving with excellent attention to detail and quality. Great communication skills, able to convey ideas clearly.
